

Supplementary Figure 2. Localization of PRC1, KIF4, CENP-E, MKLP1 and Aurora B in colcemid-treated anaphase cells. HeLa cells were treated with 1 $\mu\text{g/ml}$ aphidicolin for 15 hrs and released for 10.5 hrs to enrich the late mitotic cells, and then treated with 10 $\mu\text{g/ml}$ colcemid for 20 min. Cells at anaphase were stained with anti-PRC1, anti-KIF4, anti-CENP-E, anti-MKLP1 and anti-Aurora B antibodies. Scale bar, 5 μm .
