

SUPPLEMENTAL FIGURE 1. (A) Amplification of the partial S sequences of severe fever with thrombocytopenia syndrome virus from family 1 (D) by real-time reverse transcription polymerase chain reaction¹⁰ and (B) partial S sequences. Lane M = marker DNA (25- and 100-base-pair mixed DNA ladder); 1 = family 1; 2 = family 1; 3 = family 1; 4 = negative control.

SUPPLEMENTAL FIGURE 2. Geographical distribution of severe fever with thrombocytopenia syndrome cases in Jeju, Korea, from May 2013 to August 2016 ($n = 27$).
