

NLRP3 inflammasome has a protective effect against oxazolone-induced colitis: a possible role  
in ulcerative colitis

Shigehiro Itani,<sup>1</sup> MD, Toshio Watanabe,<sup>1,2</sup> MD, PhD, Yuji Nadatani,<sup>1</sup> MD, PhD, Naoki Sugimura,<sup>1</sup> MD, Sunao Shimada,<sup>1</sup> MD, Shogo Takeda,<sup>1</sup> MD, PhD, Koji Otani,<sup>1</sup> MD, PhD, Shuhei Hosomi,<sup>1</sup> MD, PhD, Yasuaki Nagami,<sup>1</sup> MD, PhD, Fumio Tanaka,<sup>1</sup> MD, PhD, Noriko Kamata,<sup>1</sup> MD, PhD, Hirokazu Yamagami,<sup>1</sup> MD, PhD, Tetsuya Tanigawa,<sup>1,2</sup> MD, PhD, Masatsugu Shiba,<sup>1</sup> MD, PhD, Kazunari Tominaga,<sup>1,2</sup> MD, PhD, Yasuhiro Fujiwara,<sup>1,2</sup> MD, PhD, Tetsuo Arakawa,<sup>1</sup> MD, PhD

**Supplementary Figure 1. Effects of caspase-1 deficiency on oxazolone-induced colitis.** A: Changes in body weight during the experimental period. Round represents WT, wild-type. B, C: Comparison of histological score between wild-type and caspase-1<sup>-/-</sup> mice on days 1 and 3. Histological scores were calculated according to the criteria (Supplementary Table 3). D, E: Histological findings in wild-type (D) and caspase-1<sup>-/-</sup> mice (E) with colitis. Compared to wild-type mice, caspase-1<sup>-/-</sup> mice exhibited severe colitis.

**Supplementary Figure 2. The influence of cohousing on OXA-induced colitis in NLRP3<sup>-/-</sup> mice and caspase-1<sup>-/-</sup> mice.** The negative effects of NLRP3 deficiency on body weights (A) and on the histological score of mice (B) were not attenuated by the cohousing of wild-type (WT) mice with NLRP3<sup>-/-</sup> mice. Histological findings in wild-type (C) and NLRP3<sup>-/-</sup> mice (D) with colitis. Compared to wild-type mice, NLRP3<sup>-/-</sup> mice exhibited severe colitis. The negative effects of caspase-1 deficiency on body weights (E) and on the histological score of mice (F) were not attenuated by the cohousing of wild-type mice with caspase-1<sup>-/-</sup> mice. Histological findings in wild-type (G) and caspase-1<sup>-/-</sup> mice (H) with colitis. Compared to wild-type mice, caspase-1<sup>-/-</sup> mice exhibited severe colitis.

**Supplementary Figure 1.**

**Supplementary Figure 2.**

**Supplementary Table 1.** Matts' histopathological grading system

|         |   |
|---------|---|
| Grade 1 | normal appearance   |
| Grade 2 | some infiltration of the mucosa or lamina propria with either round cells or polymorphs                 |
| Grade 3 | much cellular infiltration of the mucosa, lamina propria, and submucosa                                 |
| Grade 4 | presence of crypt abcesses, with much infiltration of all layers of the mucosa                          |
| Grade 5 | ulceration, erosion, or necrosis of the mucosa, with cellular infiltration of some or all of its layers |

**Supplementary Table 2.** Antibodies Used

|                   | Source information                          | Dosage          | Use         |
|-------------------|---|-----------------|-------------|
| NLRP3             | mouse monoclonal<br>(AdipoGen)              | 1:200 dilution  | IHC (human) |
| cleaved caspase-1 | rabbit polyclonal<br>(EnoGene)              | 1:200 dilution  | IHC (human) |
| CD68              | rabbit polyclonal<br>(LifeSpan BioSciences) | 1:200 dilution  | IHC (human) |
| CD68              | mouse monoclonal<br>(Abcam)                 | 1:100 dilution  | IHC (human) |
| MUC2              | rabbit polyclonal<br>(GeneTex)              | 1:800 dilution  | IHC (mouse) |
| NLRP3             | mouse monoclonal<br>(AdipoGen)              | 1:1000 dilution | WB (mouse)  |
| caspase-1         | rabbit polyclonal<br>(Santa Cruz)           | 1:200 dilution  | WB (mouse)  |
| IL-1 $\beta$      | goat polyclonal<br>(R&D Systems)            | 1:500 dilution  | WB (mouse)  |
| IL-18             | rabbit polyclonal<br>(Abnova)               | 1:500 dilution  | WB (mouse)  |
| CDX2              | mouse monoclonal<br>(Santa Cruz)            | 1:100 dilution  | WB (mouse)  |
| $\beta$ -actin    | mouse monoclonal<br>(Sigma-Aldrich)         | 1:5000 dilution | WB (mouse)  |
