## Table of Contents

<b>Figure S1.</b> NMR spectrum of carboxyl dendron .....	2
--	---

**Figure S1.** NMR spectrum of carboxyl dendron. The <sup>1</sup>H NMR spectrum was acquired at 600 MHz (Varian Inova) using deuterated methanol. Based on relative peak integration, complete attachment of carboxyl groups to the dendrons was achieved (expected ratio of i+j to b is 32:2).
