

**Table S6.** Composition of media used for derivation of the Definitive Endoderm from iPS cells.

<b>DE1</b>	RPMI-1640, Foetal Bovine Serum 2%
<b>DE2</b>	RPMI-1640, Human Serum 2%
<b>DE3</b>	RPMI-1640, human recombinant Albumin 1 mg/mL, human recombinant Insulin 10 µg/mL, human recombinant Transferrin 10 µg/mL, sodium selenite 20nM
<b>DE4</b>	RPMI-1640, human recombinant Albumin 1 mg/mL, human recombinant Insulin 10 µg/mL, human recombinant Transferrin 10 µg/mL, chemically defined lipid concentrate 1:50 dilution, ascorbic acid 12.5 µg/mL
