Care as usual cohort			
Genotype	Starting dose (mg per day)	Dose after first evaluation (mg per day)	Dose after second evaluation (mg per day)
PM	75	If too high: 50	If too high: 25
IM	75	If too high: 50	If too high: 25
EM	75	If too low: 100 If too high: 50	If too low: 125 If too high: 25
UM	75	If too low: 100	If too low: 125
Genotyping cohort			
Genotype	Starting dose (mg per day)	Dose after first evaluation (mg per day)	Dose after second evaluation (mg per day)
PM	30	If too high: 25	If too high: 10
IM	75	If too high:50	If too high: 25
EM	75	If too low: 100 If too high: 50	If too low: 125 If too high: 25
UM	125	If too low: 150	If too low: 175
Genotyping cohort (as included in scenario analysis with dose adaptations for IMs)			
Genotype	Starting dose (mg per day)	Dose after first evaluation (mg per day)	Dose after second evaluation (mg per day)
PM	30	If too high: 25	If too high: 10
IM	50	If too low: 75 If too high: 30	If too low: 100 If too high: 25
EM	75	If too low: 100 If too high: 50	If too low: 125 If too high: 25
UM	125	If too low: 150	If too low: 175
