

S3 Fig. CSF- $A\beta$ vs. CSF- τ concentration available at last subjects' observations.

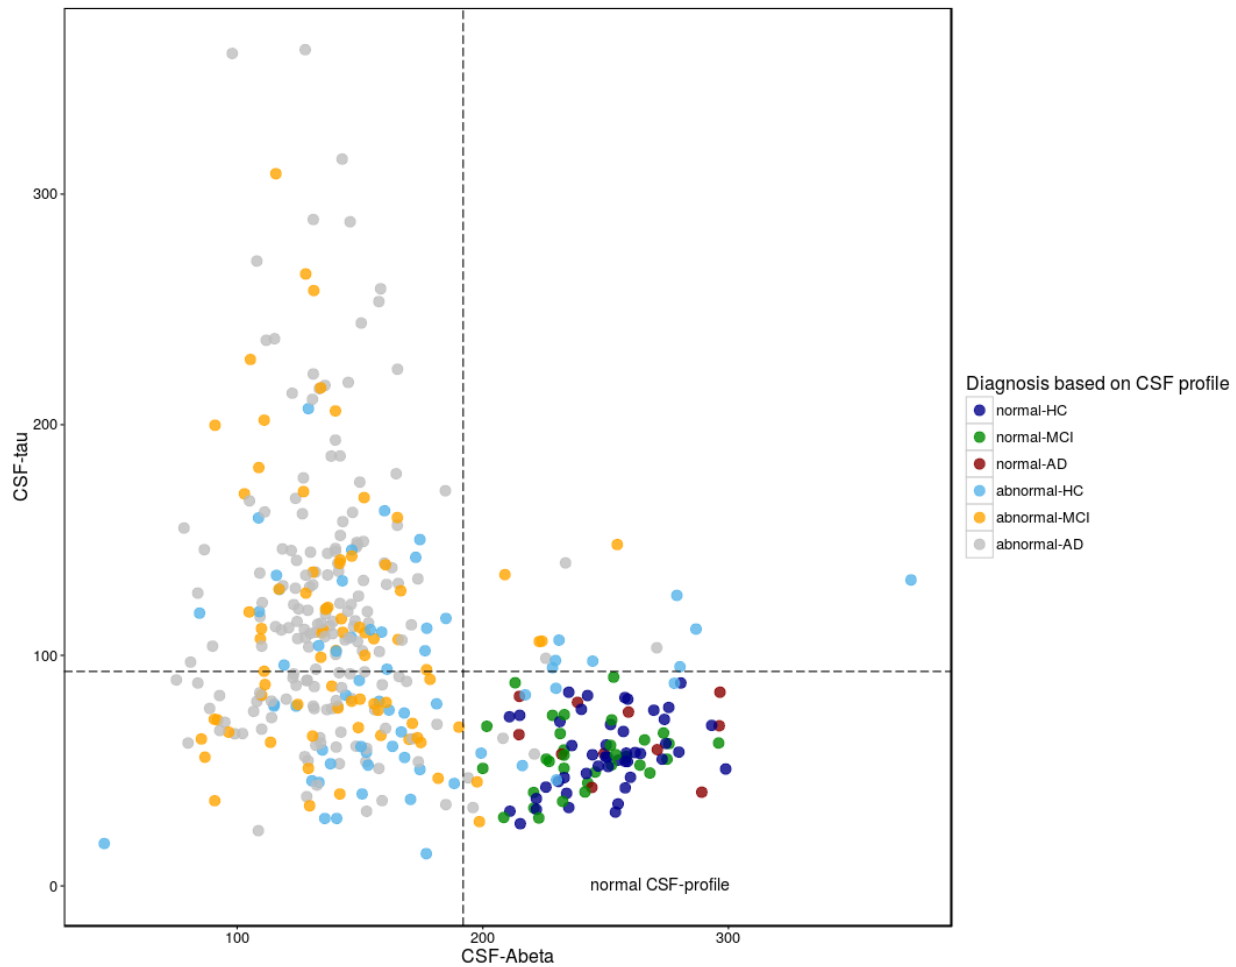

Fig 3. CSF- $A\beta$ vs. CSF- τ concentration available at last subject" observations.

Dots represent the last CSF biomarker measured for subjects available at April, 2015. Vertical and horizontal dashed lines split normal CSF-profile from abnormal profile. Null models for characterization of healthy brain structures were built from samples labelled with blue dots.
