

S4 Fig. Boxplot of trajectory of left hippocampal volume for normal- HC_{csf} subjects.

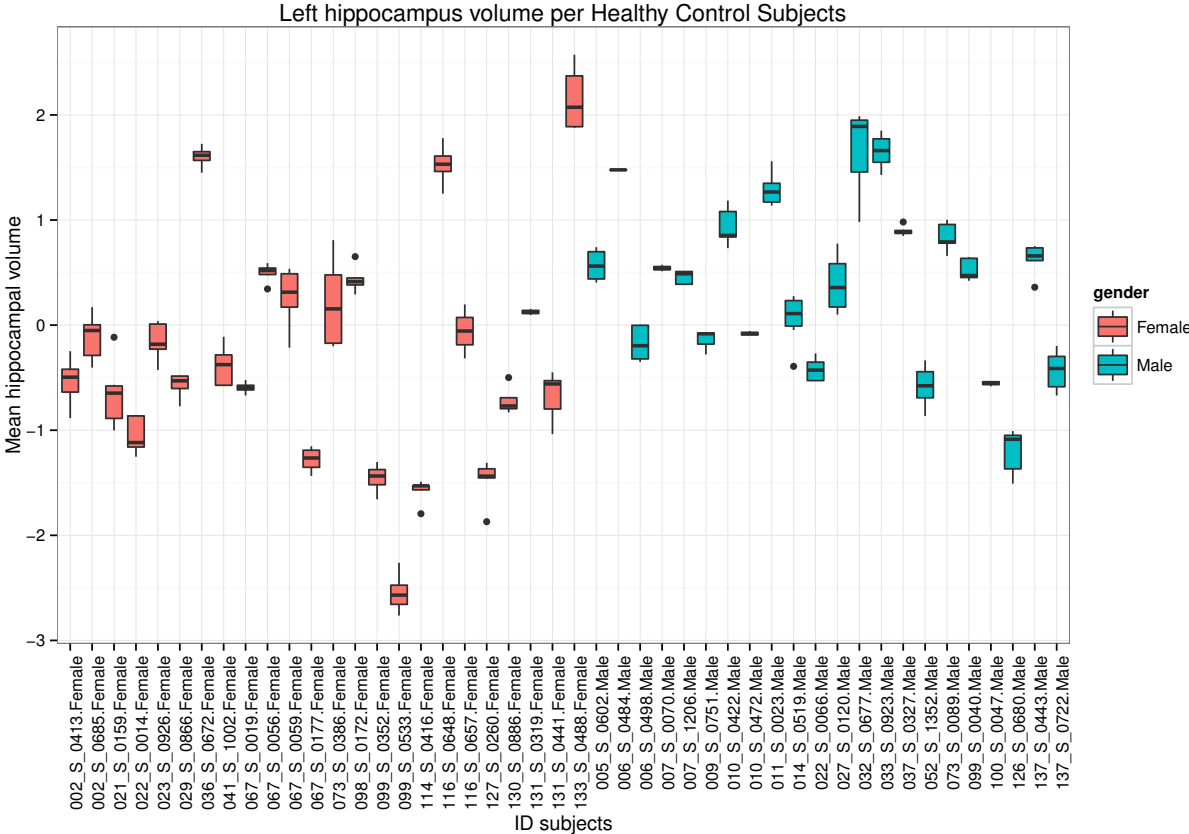

Fig 4. Boxplot of trajectory of left hippocampal volume for normal- HC_{csf} subjects.

High between-subject variability is evident, e.g., by comparing subject 099_S_0533 with subject 133_S_0488. Likewise, there is a strong indication of gender effect over hippocampal volume, female volumes are less than the man ones. Note that we standardized every MRI-based biomarker to have zero mean and unit variance.
