

1 **Supplemental Table S4.** Significant QTLs from composite interval mapping of transformed
2 flowering time phenotypes in the ABR6 x Bd21 F_{4:5} families (T1).

| ENV ^a | Chr ^b | cM | EWT ^c | LOD | AEE ^d | PVE ^e |
|------------------|------------------|-------|------------------|------|------------------|------------------|
| 2 | Bd1 | 297.6 | 3.14 | 7.50 | 0.95 | 19.2% |
| 2 | Bd2 | 409.0 | 3.14 | 3.35 | 0.56 | 6.6% |
| 2 | Bd3 | 93.2 | 3.14 | 5.61 | 0.82 | 13.5% |
| 4 | Bd3 | 60.8 | 3.20 | 5.12 | 4.13 | 16.9% |
| 5 | Bd1 | 297.6 | 3.35 | 5.52 | 8.88 | 48.0% |

3 ^aEnvironment (see Supplemental Table S1)

4 ^bChromosome

5 ^cExperiment-wide permutation threshold

6 ^dAdditive effect estimate for transformed phenotypes

7 ^ePercent of phenotypic variance explained
