

**Figure S1.** Proportion of eye positions on target center, given BCEA (A) or within target boundary (B) as in Figure 4. Note change in axes scales between A & B. Blue bars are data for small ( $0.6^\circ$ ) target trials and orange bars are data for big ( $1.7^\circ$ ) target trials. Error bars are one standard deviation of the mean. Group means are shown as the right-most bars for each plot.
