

Supplemental Figure 1.

*IFN- $\gamma$  ELISpot responses in the splenocyte and PBMC populations of pNP-immunized Guinea Pigs.*

Splenocytes and PBMCs were harvested from Guinea pigs after immunization with pNP, and stimulated with Influenza NP antigen peptide Pools 1 to 3. Mean (+/-SEM) IFN- $\gamma$  SFU's for a group of 5 pNP-immunized guinea pigs are plotted.

Supplemental Figure 2.

*PBMC IFN- $\gamma$ + ELISpot responses to RSV-F antigen peptide Pools 1&2.*

PBMCs were harvested from Guinea pigs after immunization with pRSV-F, and stimulated with RSV-F antigen peptide Pool 1 or 2. Mean (+/-SEM) IFN- $\gamma$  SFU's for a group of 5 pRSV-F immunized guinea pigs are plotted.
