

Randomized Feasibility Study of a Novel Experience-Based Internet Intervention to Support Self- Management in Chronic Asthma

Online portal

Study design

Patient information sheet and consent form sent to eligible participants

Signed consent form received by trial office

Participant details entered into online trial portal

Invitation to complete baseline questionnaires

Randomised to active or comparator website

2 weeks access to website

Invitation to complete follow up questionnaires

Qualitative interviews

What is the portal?

An online interactive interface

Three elements

- (1) Trial Management web pages
- (2) Participant online questionnaires
- (3) Back end (programming code supporting the design and functionality)

Purpose of the portal

- Data collection & storage facility
- Entering participants into the study
- Following progress of study participants
- Participant data – questionnaire responses and website usage
- Data downloads

[Log in](#)

Developer note:

There are three types of login:

- **Trial manager** Can create and manage Trial Participants
- **Independent reviewer** Can view tracking, ratings and comment information
- **"Super user"** Can see all parts of the system, and can perform extra administration tasks on participants

There is currently one test login for each of these types of user:

 **Trial Manager**
Username: *trial*, Password: *****

 **Independent reviewer**
Username: *review*, Password: *****

 **Super User**
Username: *super*, Password: *****
