

Table S7. Association signal at varying FDR thresholds. Percentage and number of Ras/MAPK polymorphisms meeting varying FDR thresholds for ASD association.

	FDR 0.1	FDR 0.2	FDR 0.3	FDR 0.5	FDR 0.7	FDR 0.9
N SNPs	0	228	263	323	1,179	1,736
% above FDR	0	9	10	13	47	69

Abbreviations: % above FDR: percentage of SNPs above FDR threshold; FDR: False Discovery Rate
