

Editorial Note: this manuscript has been previously reviewed at another journal that is not operating a transparent peer review scheme. This document only contains reviewer comments and rebuttal letters for versions considered at Nature Communications.

REVIEWERS' COMMENTS:

Reviewer #3 (Remarks to the Author):

The authors have nicely incorporated previous comments. I would suggest to highlight promoter methylation in cases with BRCA2 mutations as a second hit for inactivation of this tumor suppressor gene inactivation.

This manuscript should be accepted for publication.
