

1 **SUPPLEMENTAL DATA**

2

3 **FIG 1.** Histograms of MIC distributions for TMP, SMX, SDZ, SXT and SXD for (a) *S. equi* subsp. *equi* (n=135) and (b) *S. equi*
4 subsp. *zooepidemicus* (n=135). MIC values for SXT and SXD are plotted based on the TMP concentration in each combination
5 antimicrobial (TMP-to-sulfonamide combination ratio 1:19). Tested concentration ranges for SXT and SXD are 0.03/0.6-32/608
6 $\mu\text{g/mL}$.

7

MIC ($\mu\text{g/mL}$)

8

9 **FIG 2.** Scattergrams of (a) SXT MIC and (b) SXD MIC versus SXT (1.25/23.75 μg) disk diffusion test zone diameter (mm) for *S.*
10 *equi* subsp. *equi* isolates (n=135). Numbers represent the numbers of isolates at each MIC/test zone diameter pair. The horizontal and
11 vertical lines represent MIC and disk diffusion cut-offs, respectively.

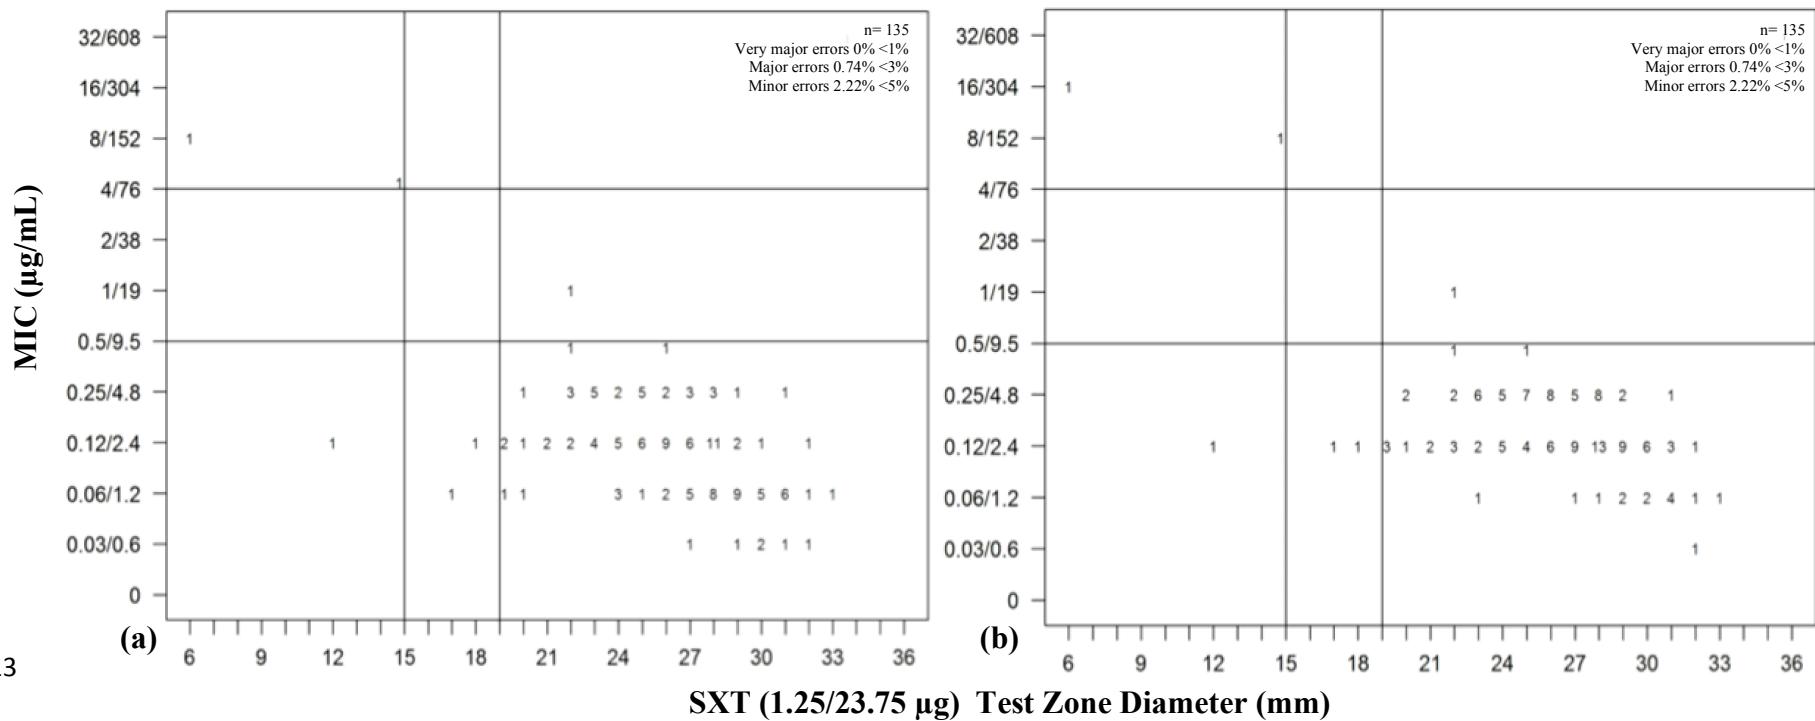

FIG 3. Scattergrams of (a) SXT MIC and (b) SXD MIC versus SXT (1.25/23.75 µg) disk diffusion test zone diameter (mm) for *S. equi* subsp. *zooepidemicus* isolates (n=135). Numbers represent the numbers of isolates at each MIC/test zone diameter pair. The horizontal and vertical lines represent MIC and disk diffusion cut-offs, respectively.

17 **TABLE 1.** FIC indexes and FIC indexes averages for SXT and SXD in 10 isolates of each *S. equi* subsp. *equi* and *S. equi* subsp.
 18 *zooepidemicus*

FIC index			FIC index				
Strain	SXT	SXD	Strain	SXT	SXD		
<i>S. equi</i> subsp. <i>equi</i>	1	0.34	0.34	1	0.1	0.43	
	2	0.34	0.32	2	0.38	0.29	
	3	0.31	0.34	3	0.31	0.48
