

Supplemental Table 1. Treatment variables evaluated, by primary cancer diagnosis

Primary Cancer Diagnosis	Treatment variables
Acute lymphoblastic leukemia	Cranial radiation (yes, no) Anthracyclines ($\geq 250 \text{ mg/m}^2$, $< 250 \text{ mg/m}^2$) Alkylating agents ($\geq 6000 \text{ mg/m}^2$, $< 6000 \text{ mg/m}^2$) High dose methotrexate (yes/no) Dexamethasone (yes, no) Prednisone (yes, no)
Astrocytoma, medulloblastoma	Cranial radiation (yes, no) Alkylating agents ($\geq 6000 \text{ mg/m}^2$, $< 6000 \text{ mg/m}^2$) Vincristine (yes, no) Prednisone (yes, no)
Hodgkin lymphoma	Chest radiation ($\geq 30 \text{ Gy}$, $< 30 \text{ Gy}$) Splenectomy (yes/no) Anthracyclines ($\geq 250 \text{ mg/m}^2$) Alkylating agents ($\geq 7,700 \text{ mg/m}^2$) Bleomycin (yes/no)
Non-Hodgkin lymphoma	Cranial radiation (yes, no) Anthracyclines ($\geq 250 \text{ mg/m}^2$, $< 250 \text{ mg/m}^2$) Alkylating agents ($\geq 6000 \text{ mg/m}^2$, $< 6000 \text{ mg/m}^2$) High dose methotrexate (yes/no) Dexamethasone (yes, no) Prednisone (yes, no)
Wilms tumor	Abdominal/flank radiation (yes, no) Anthracyclines ($\geq 250 \text{ mg/m}^2$, $< 250 \text{ mg/m}^2$) Vincristine (yes, no)
Neuroblastoma	Cranial radiation (yes, no) Chest radiation (yes, no) Abdominal radiation (yes, no) Pelvic radiation (yes, no) Anthracyclines ($\geq 250 \text{ mg/m}^2$, $< 250 \text{ mg/m}^2$) Alkylating agents ($\geq 6000 \text{ mg/m}^2$, $< 6000 \text{ mg/m}^2$) Cisplatin (yes, no) Autologous transplant (yes, no)
Soft tissue sarcoma	Cranial radiation (yes, no) Chest radiation (yes, no) Abdominal radiation (yes, no) Pelvic radiation (yes, no) Anthracyclines ($\geq 250 \text{ mg/m}^2$, $< 250 \text{ mg/m}^2$) Alkylating agents ($\geq 6000 \text{ mg/m}^2$, $< 6000 \text{ mg/m}^2$) Vincristine (yes, no) Methotrexate (yes, no) Amputation (yes, limb sparing, neither)
Ewing sarcoma	Chest radiation (yes, no) Pelvic radiation (yes, no) Anthracyclines ($\geq 250 \text{ mg/m}^2$, $< 250 \text{ mg/m}^2$) Methotrexate (yes, no) Dexamethasone (yes, no) Amputation (yes, limb sparing, neither)
Osteosarcoma	Chest radiation (yes, no) Pelvic radiation (yes, no) Anthracyclines ($\geq 250 \text{ mg/m}^2$, $< 250 \text{ mg/m}^2$) Alkylating agents ($\geq 6000 \text{ mg/m}^2$, $< 6000 \text{ mg/m}^2$) High dose methotrexate (yes/no) Vincristine (yes, no) Dexamethasone (yes, no) Bleomycin (yes, no) Amputation (yes, limb sparing, neither)

Gy=Gray, mg=milligrams, m²=square meters

Supplemental Table 2. Grade 3 and 4 chronic health conditions scored according to Common Terminology Criteria of Adverse Events (CTCAE) v4.03 with adaptations

Category	Chronic Condition	Grade 3 Definition	Grade 4 Definition
Vision and Eye	Cataract	<ul style="list-style-type: none"> Cataracts, requiring surgery 	<ul style="list-style-type: none"> Not applicable
	Blindness	<ul style="list-style-type: none"> Legally blind in only one eye 	<ul style="list-style-type: none"> Legally blind in both eyes or loss of an eye
Hearing	Loss of Hearing	<ul style="list-style-type: none"> Hearing loss requiring a hearing aid Deafness in one ear not completely corrected by hearing aid 	<ul style="list-style-type: none"> Deafness in both ears not completely corrected by hearing aid
Speech		<ul style="list-style-type: none"> Aphonia 	<ul style="list-style-type: none"> Not applicable
Pulmonary	Emphysema	<ul style="list-style-type: none"> Emphysema, requiring medication 	<ul style="list-style-type: none"> Not applicable
	Pulmonary fibrosis	<ul style="list-style-type: none"> Requiring oxygen therapy 	<ul style="list-style-type: none"> Not applicable
	Other respiratory conditions	<ul style="list-style-type: none"> Primary pulmonary hypertension 	<ul style="list-style-type: none"> Chronic respiratory failure Respiratory arrest Respirator dependency status
Cardiovascular	Coronary artery disease	<ul style="list-style-type: none"> Myocardial infarction, angina, or coronary heart disease not requiring a cardiac catheterization but on anti-anginal medication 	<ul style="list-style-type: none"> Myocardial infarction, requiring cardiac catheterization, angioplasty, or coronary artery bypass graft
	Congestive heart failure	<ul style="list-style-type: none"> Congestive heart failure, requiring medication 	<ul style="list-style-type: none"> Heart transplant
	Arrhythmia	<ul style="list-style-type: none"> Arrhythmia , requiring pacemaker 	<ul style="list-style-type: none"> Ventricular fibrillation/flutter
	Valvular heart disease	<ul style="list-style-type: none"> Not applicable 	<ul style="list-style-type: none"> Heart valve replacement
	Stroke	<ul style="list-style-type: none"> Occlusion of cerebral arteries 	<ul style="list-style-type: none"> Stroke / Cerebrovascular Accident (CVA)
	Pericardial disease	<ul style="list-style-type: none"> Pericardial disease requiring surgical intervention 	<ul style="list-style-type: none"> Not applicable
	Other cardiac conditions	<ul style="list-style-type: none"> Thromboangiitis obliterans (Buerger's disease) Hypotension, unspecified Other chronic pulmonary heart diseases 	<ul style="list-style-type: none"> Not applicable
	Thromboembolic disease	<ul style="list-style-type: none"> Blood clot in head, lung, arm, leg, or pelvis, NOS 	<ul style="list-style-type: none"> Pulmonary embolism and infarction Embolism and thrombosis of unspecified artery
	Other vascular conditions	<ul style="list-style-type: none"> Aorta-subclavian-carotid bypass Other (peripheral) vascular shunt or bypass Other repair of aneurysm Repair of arteriovenous fistula 	<ul style="list-style-type: none"> Other excision of vessels, aorta, abdominal (aorta)
	Hypertension	<ul style="list-style-type: none"> Hypertensive chronic kidney disease Hypertensive heart disease 	<ul style="list-style-type: none"> Not applicable
Gastrointestinal	Hepatitis	<ul style="list-style-type: none"> Cirrhosis 	<ul style="list-style-type: none"> Liver transplant
	Intestinal obstruction	<ul style="list-style-type: none"> Surgery for intestinal obstruction 	<ul style="list-style-type: none"> Not applicable

Renal	Renal failure	<ul style="list-style-type: none"> Not applicable 	<ul style="list-style-type: none"> Dialysis or kidney transplant
	Urinary incontinence	<ul style="list-style-type: none"> Neurogenic bladder 	<ul style="list-style-type: none"> Not applicable
	Other renal conditions	<ul style="list-style-type: none"> Nephrotic syndrome with unspecified pathological lesion in kidney 	<ul style="list-style-type: none"> Rupture of bladder, non-traumatic
Musculoskeletal	Amputation	<ul style="list-style-type: none"> Total ostectomy, femur Disarticulation of elbow Amputation through humerus, Upper arm amputation Disarticulation of shoulder Interthoracoscapular amputation, Forequarter amputation Disarticulation of knee Amputation above knee, Amputation of leg through femur, Amputation of thigh Disarticulation of hip Abdominopelvic amputation, Hemipelvectomy, Hindquarter amputation Lower leg or ankle reattachment, reattachment of leg NOS Traumatic amputation of arm and hand (complete) (partial), unilateral, at or above elbow Upper limb amputation Lower limb amputation 	<ul style="list-style-type: none"> Not applicable
	Joint replacement	<ul style="list-style-type: none"> Joint replacement 	<ul style="list-style-type: none"> Not applicable
Neurological	Balance	<ul style="list-style-type: none"> Problems with balance or ability to manipulate objects, severe 	<ul style="list-style-type: none"> Problems with balance or ability to manipulate objects, disabling
	Paralysis	<ul style="list-style-type: none"> Disorders of accessory [11th] nerve 	<ul style="list-style-type: none"> Paralysis
	Other neurological conditions	<ul style="list-style-type: none"> Intracranial ventricular shunt or anastomosis Ventricular shunt to abdominal cavity and organs Irrigation and exploration of ventricular shunt Replacement of ventricular shunt Multiple sclerosis Difficulty in walking 	<ul style="list-style-type: none"> Coma
Hematologic		<ul style="list-style-type: none"> Not applicable 	<ul style="list-style-type: none"> Aplastic anemia
Endocrine	Thyroid Nodules	<ul style="list-style-type: none"> Thyroid nodules, requiring surgery 	<ul style="list-style-type: none"> Not applicable
	Diabetes	<ul style="list-style-type: none"> Diabetes requiring insulin 	<ul style="list-style-type: none"> Not applicable
	Gonadal Dysfunction	<ul style="list-style-type: none"> Post ablative ovarian failure or testicular hypo- function Premature menopause, onset <40 years of age Absence of menstruation, onset <40 years of age Ovarian failure Female infertility, associated with anovulation 	<ul style="list-style-type: none"> Not applicable

		<ul style="list-style-type: none"> • Female infertility, unspecified origin • Other ovarian failure • Azoospermia • Male infertility unspecified 	
	Other Hormone Conditions	<ul style="list-style-type: none"> • Pan hypopituitarism • Diabetes insipidus • Corticoadrenal insufficiency • Glucocorticoid deficiency 	<ul style="list-style-type: none"> • Not applicable
Secondary Neoplasms	Secondary Neoplasms	<ul style="list-style-type: none"> • Thyroid carcinoma • Benign meningiomas requiring resection • Lobular cancer in situ of the breast 	<ul style="list-style-type: none"> • Invasive malignancies • Ductal carcinoma in situ of the breast

Supplemental Table 3. Treatment and chronic conditions by decade - Acute Lymphoblastic Leukemia

Treatment	1970-1979 (N=1361)		1980-1989 (N=1714)		1990-1999 (N=2544)	
	N	%	N	%	N	%

%=percent, RR=relative risk, CI=confidence interval

Regression models used a binomial distribution with a log link. All models adjusted for attained age, survival time, sex, race and sampling weights. Model fit was assessed by examining Akaike Information Criteria. Final models all had AIC differences (when compared to a model adjusted only for attained age, survival time, sex, race and sampling weights) of ≥ 10 , N*=number – displayed Ns for acute lymphoblastic leukemia survivors are weighted. **Bold text indicates RR estimates with $p < 0.05$**
