

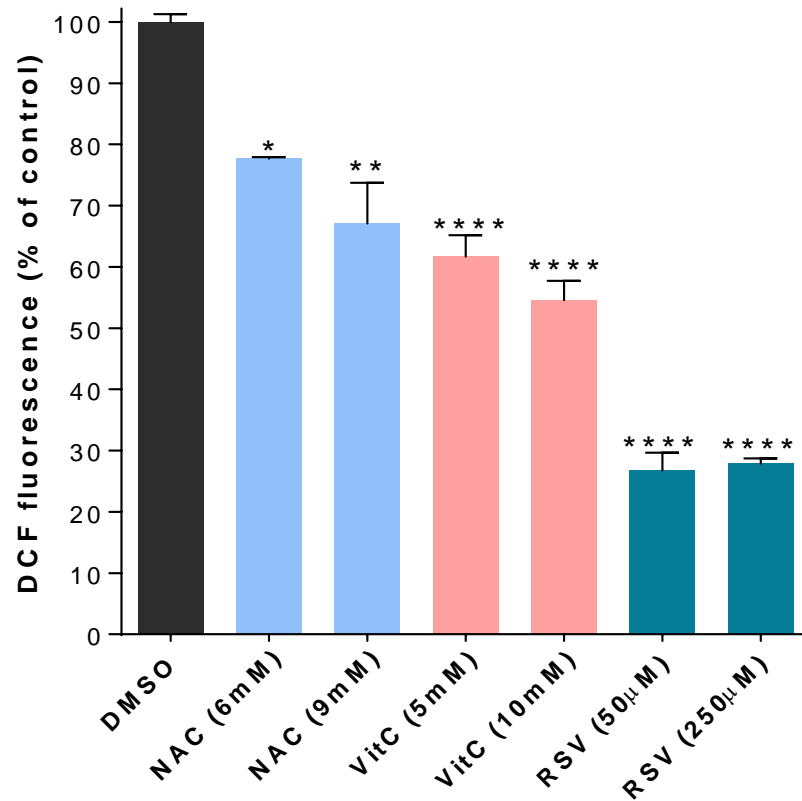

Figure S2

Effect of different treatments on ROS levels. Relative ROS levels in wild-type N2 worms after different treatments were measured using a the H2DCF-DA assay. NAC, N-Acetyl-Cysteine; VitC, vitamin C; RSV, resveratrol. Data are means \pm SEM (n = 3); *p<0.05, **p<0.01, ****p<0.0001 relative to DMSO-treated controls (one-way ANOVA followed by post hoc Dunnett's test).
