

S3 Table. PLS correlation coefficients for taxa and biological covariates with a statistically significant correlation. Statistical significance is indicated by that the PLS correlation coeff (Corr) 95% CI does not include zero. Text highlighted in grey refers to taxa with a correlation coefficient >0.1 and (G) to the genus level.

Q^2 =cross validated predictive value of the model.

EF versus SF group				BFR versus no BFR			
4 month (Q2=0.15)		12 month (Q2=0.05)		4 month (Q2=0.57)		12 month (Q2=0.30)
