Additional File 5 (figure): Candidate sweep region in relation to rs14207559 and *SEMA5A* gene, showing allele frequency in HAS39 (red) and HAR16 (orange) (upper figure), LAS39 (blue) and LAR16 (teal) (middle figure) and the FST between HAS39 and LAS39 (grey) across a wider genomic region to show location of SNP marker rs14207559 (red dot) (lower figure). Candidate sweep region indicated with orange line and SEMA5A gene indicated with blue line in all figures.
