17.0	0.6	0.7	0.9	1.8	1.9	2.0
17.8	0.5	0.6	0.8	1.7	1.9	2.0

Age is given as years and strain rate values are given as s^{-1}

One outside value was excluded from analysis. Please note, that due to the low number of cases for young children predictions are quite imprecise as evident from the large separation of the outer centiles.
