

Evaluation of CanMEDS competencies

After each consultation in the LC-SRC faculty from internal medicine evaluated the CanMEDS competencies for the team that performed the consultation. To evaluate the consultation the CanMEDS mini-CEX was used to grade and provide feedback. These CanMEDS mini-CEX were regularly used by faculty to evaluate clinical competence of students in their regular clerkships with a similar form. The seven CanMEDS competencies were scored on a 5-point Likert scale (compared to the level of a junior doctor, 3 meant achieving a junior doctor level, >3 better, <3 worse), see below.

Mini-Clinical Evaluation Exercise (Mini-CEX)									
CANmeds competencies									
Team, student names:				Assessor's name:					
				Clinical condition:					
Study years: B1 B2 B3 M1 M2 M3				Date of consultation:					
				Not assessable	Under level of junior doctor		level of junior doctor	Beyond level of junior doctor	
Medical expert	History taking & physical examination, distinguish main points and side issues, differential diagnosis & making a plan			N/A	1	2	3	4	5
Communicator	Patient contact (manners, respects) Giving information and advice			N/A	1	2	3	4	5
Scholar	Critically analyzing medical information sources and using it in a definite plan			N/A	1	2	3	4	5
