
Table S 1. Statistics of data fitting $\rho = c/(n - 1)$ to synthetic networks.

	Lattice	Small-world	Random	Scale-free
c	3.265	3.258	2.966	3.215
R^2	0.999	0.997	0.993	0.998

The fit's constant c and the adjusted R^2 coefficient are reported along different network models.
