ALA, α -linolenic acid; D5D, $\Delta 5$ -desaturase; D6D, $\Delta 6$ -desaturase; EPA, eicosapentaenoic acid; DHA, docohexaenoic acid; LA, linoleic acid; PA, palmitic acid; SAD, sagittal abdominal diameter; SADHR, sagittal abdominal diameter-to-height ratio; SCD, stearyl-CoA-desaturase; WC, waist circumference; WCHR, waist circumference-to-height ratio; WHR, waist-hip ratio; WHHR, waist-hip-height ratio.

¹Spearman's rank correlation coefficients (r) for women and men are shown above and below the diagonal, respectively.

²Significance of r : $|r| > 0.04$, $P < 0.05$; $|r| \geq 0.06$, $P < 0.01$; $|r| \geq 0.07$ in women or $|r| \geq 0.08$ in men, $P < 0.001$; $|r| > 0.09$, $P < 0.0001$.
