
Supplemental Table II. *Transposable elements fragments found in maize NB mtDNA*

Size	NB Coordinates	TIGR classification	Name
227	473,615-473,841	<i>Triticum</i> retrotransposon	sabrina 11561
152	71,279-71,430	<i>Oryza</i> retrotransposon	gypsy bx34e
152	171,899-172,050	<i>Oryza</i> retrotransposon	gypsy bx34e
60	256,985-257,045	<i>Triticum</i> retrotransposon	latidu 258C22-1
50	391,058-391,107	<i>Oryza</i> retrotransposon	Osr3-1

The TIGR grass transposable element database was used as the source of element sequences (see Methods).
