

### Supplemental Figure S1

Supplemental Figure 1. Time kill curve demonstrating time-kill curves utilizing sub-MIC concentrations of colistin (COL, 0.4 mg/L) plus tazobactam (TZ, 20 mg/L) against 4 clinical *A. baumannii* strains (AB1-AB4, Panels A-D, respectively), and AB5075 (panel E). Four of the 5 strains showed synergy, whereas one strain (AB3) did not.
