

**Table S3**

This table shows PPV and sensitivity determined from the RNA-PET gold standard sets obtained either by mapping the data with ContextMap 2 (abbreviated as CM) or BWA. In addition, differences in PPV and sensitivity are indicated. Positive values indicate that PPV or sensitivity are higher if the ContextMap 2 RNA-PET mapping is used to determine the gold standard set instead of the BWA RNA-PET mapping and negative values indicate that they decrease.

Data set	Pred. method	RNA-seq rep.	RNA-PET rep.	PPV (CM)	PPV (BWA)	Diff.	Sens. (CM)	Sens. (BWA)	Diff.
MCF-7									
MCF-7	ContextMap	1	1	0.764	0.637	0.127	0.043	0.043	0
	ContextMap	1	2	0.802	0.69	0.111	0.044	0.045	-0.001
	ContextMap	2	1	0.78	0.656	0.124	0.047	0.047	0
	ContextMap	2	2	0.818	0.706	0.111	0.047	0.049	-0.001
