

Supplementary figure 2. Binding constant determination for HsdC. A – series of EMSA with different protein dilutions 1 to 15: 0, 93.75, 187.5, 281.25, 375, 468.75, 562.5, 656.25, 750, 843.75, 937.5, 1125, 1312.5, 1500, 1687.5 nM. B – Experimental curve and best fit approximation obtained by least squares method.
