Supplemental Figure S1

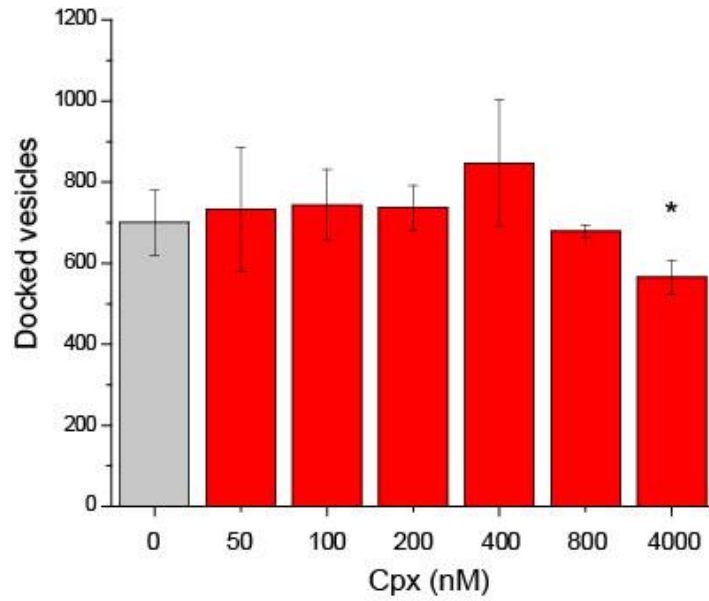

Figure S1. Figure Caption. Vesicle docking is not significantly affected by Cpx. Histogram of the docked v-vesicles harboring both VAMP2 and Syt1 at various concentrations of Cpx. Error bars denote the S.D. of three independent experiments with 5 randomly selected screens shots. Statistical significance was analyzed by the Student's t-test comparing Cpx concentration with no Cpx; *P < 0.05.
