7 **Supplemental Figure 1**

27 **Supplemental Figure 1. No significant difference between HwTw, HcTw and**
28 **bleeding groups**

29 The graph shows the change over time under each condition. A significant blood
30 pressure disparity was not observed in the head cooling group (HcTw) nor the bleeding
31 group (Bleeding) compared to the control group (HwTw) based on two-way ANOVA.
