

SUPPLEMENTARY FIGURE
Zhai et al.

Supplementary Figure S1: Surface electrostatics surrounding the sphingolipid binding site in **a)** ACD11, **b)** CPTP, and **c)** GLTP, respectively. (Blue = cationic; red = anionic; and white = neutral residues). Bound sphingolipids are shown in ball-and-stick representation with carbon (green), oxygen (red), nitrogen (blue) and phosphorus (orange). A similar comparison appears in ref. 13.
