

Supplementary Table S4. Elimination processes.

Renal clearance processes considered in the developed PBPK models of APAP and CAF. Kidney plasma clearances were parameterized in order to match experimental observations.

Drug / Metabolite	Plasma clearance [l/min/kg]	Ref.
APAP	1.27E-04	(1,2)
APAPC	4.38E-04	(1)
APAPG	1.19E-03	(1)
APAPS	4.56E-03	(1)
NAPQI	4.62E-03	adjusted from (3)
CAF	3.00E-03	(4)
