

a *DOCK5* mRNA expression levels

b *ECT2* mRNA expression levels

c *ARHGEF7* mRNA expression levels

Supplementary Figure 1: siRNA validation. (a) *DOCK5* mRNA expression levels normalised to *GAPDH* for mock-transfected and *DOCK5* siRNA containing LM2 and MDA-MB-231s. (b) *ECT2* mRNA expression levels normalised to *GAPDH* for mock-transfected and *ECT2* siRNA containing LM2 and MDA-MB-231s. (c) *ARHGEF7* mRNA expression levels normalised to *GAPDH* for LM2 and MDA-MB-231s that were mock-transfected, contained *ARHGEF7* siRNA, and individual siRNAs targeting *ARHGEF7*. Data are shown as means \pm standard deviation from at least 3 technical replicates.
