

Supplemental Table 1: Patient characteristics and treatment history.

Tumor number	Patient's gender	Age	Treatment for primary UM	Previous treatment (Liver-directed)	Previous treatment (Others)	Molecular characteristics of metastatic UM	Tumor source
EX-Pt#4	Female	53	Radioactive plaque	Immunoembolization, TACE with BCNU, SIR-Spheres® 90Y microspheres	Ipilimumab	GNAQ Q209P	Right axillary, subcutaneous metastasis

BCNU: 1,3-bis(2-chloroethyl)-1-nitrosourea

DEBDOX: Doxorubicin-eluting beads
