

Supplementary information, Figure S1 Analyses of YTHDF3 PAR-CLIP data. (**A**) Overlap of YTHDF3 PAR-CLIP peaks in biological triplicates with 11,750 common peaks identified. (**B**) Distribution of PAR-CLIP peaks from each replicate along the length of mRNA. (**C**) Region distribution of common peaks from YTHDF3 PAR-CLIP triplicates. (**D**) YTHDF3-binding motif identified from PAR-CLIP peaks in each replicate. P values and the percentage of peaks with the motif were indicated. (**E**) Gene Ontology (GO) analysis of top 500 target genes shared in PAR-CLIP and RIP-seq of YTHDF3 with DAVID 6.7 [49, 50]. GO terms with p < 0.001 were visualized with REVIGO [51].
