Supplementary information, Figure S2

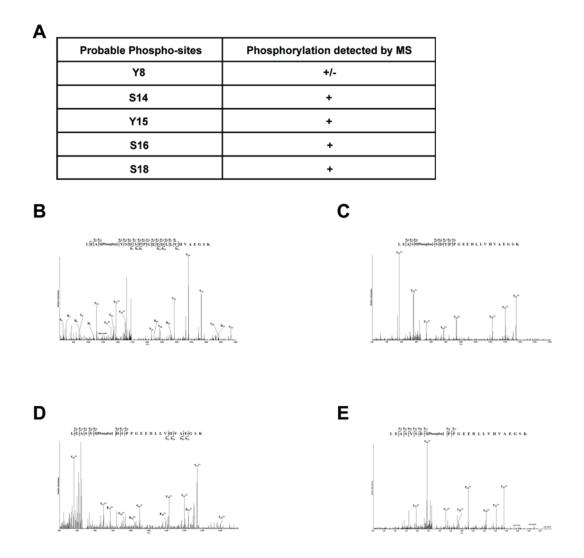

Figure S2 Identification of mATG9 N-terminal phosphorylation sites. (**A**) Summary of mass spectrometry results. Samples were prepared as described in **Figure 2A**. (**B-E**) Identification of phosphorylation of mATG9 at S14, Y15, S16 and S18 by liquid chromatography-mass spectrometry (LC-MS)/MS analysis. Phosphorylation at Y8 was not confirmed due to limited peptide capture.
