

***In vivo* phage display screening for tumor vascular targets in glioblastoma identifies a llama nanobody against dynactin-1-p150^{Glued}**

Supplementary Materials

Supplementary Figure S1: C-C7 recognizes tumor vessels in colon carcinoma xenografts. Immunohistochemical analysis shows that C-C7 recognizes vasculature in subcutaneous colorectal cancer xenografts C26 (A) and C38 (B). Bars correspond to 50 μ m.
