

## Circulating exosomes potentiate tumor malignant properties in a mouse model of chronic sleep fragmentation

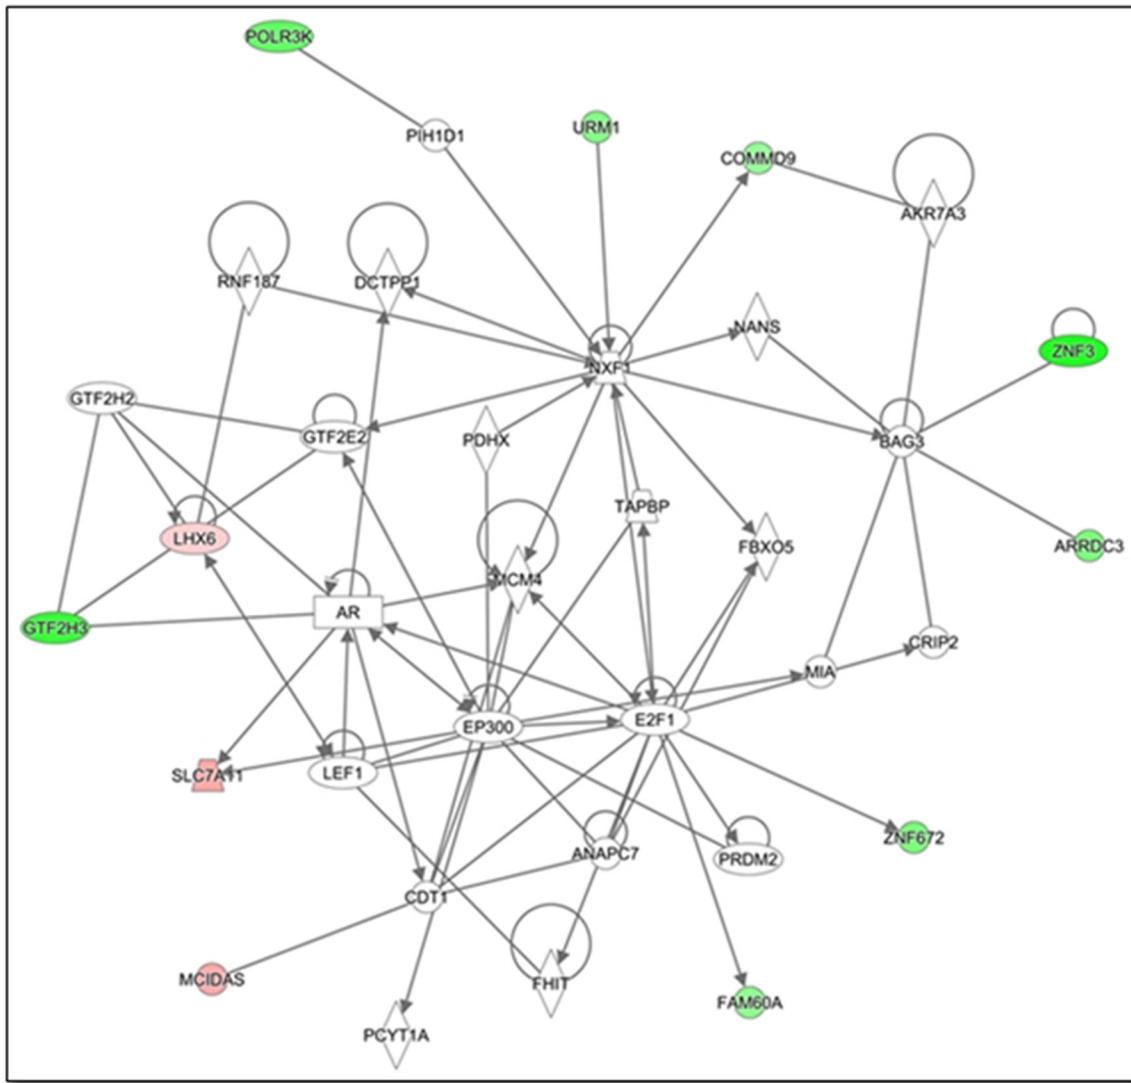

### Supplementary Materials

**Supplementary Figure S1:** Diagram illustrates the integration of miRNA target predictions and differentially expressed mRNAs genes identified in TC1 cells.

**Supplementary Figure S2:** Gene ontology of the integrated miRNA target predictions and differentially expressed mRNAs in TC1 cells after treatment with SF or SC-derived plasma exosomes, and include biological processes, molecular functions, and cellular components.

**Supplementary Figure S3:** Ingenuity pathway analysis illustrating networks derived from cell cycle, reproductive system development and function, and cancer.

**Supplementary Table S1: List of the top 50 highly significant differentially expressed mRNA genes identified after TC1 cell treatment with exosomes from SF(–) and SC(–). See Supplementary Table S1**

**Supplementary Table S2: List of KEGG potential pathways identified in TC1 cells after treatment with SF(–) and SC(–)-derived plasma exosomes**

Number	Term	# of genes	Percentage	p-value
1	mmu04110:Cell cycle	35	1.36	1.43E–06
2	mmu03040:Spliceosome	30	1.17	1.11E–04
3	mmu04130:SNARE interactions in vesicular transport	13	0.51	7.41E–04
