

Supporting information

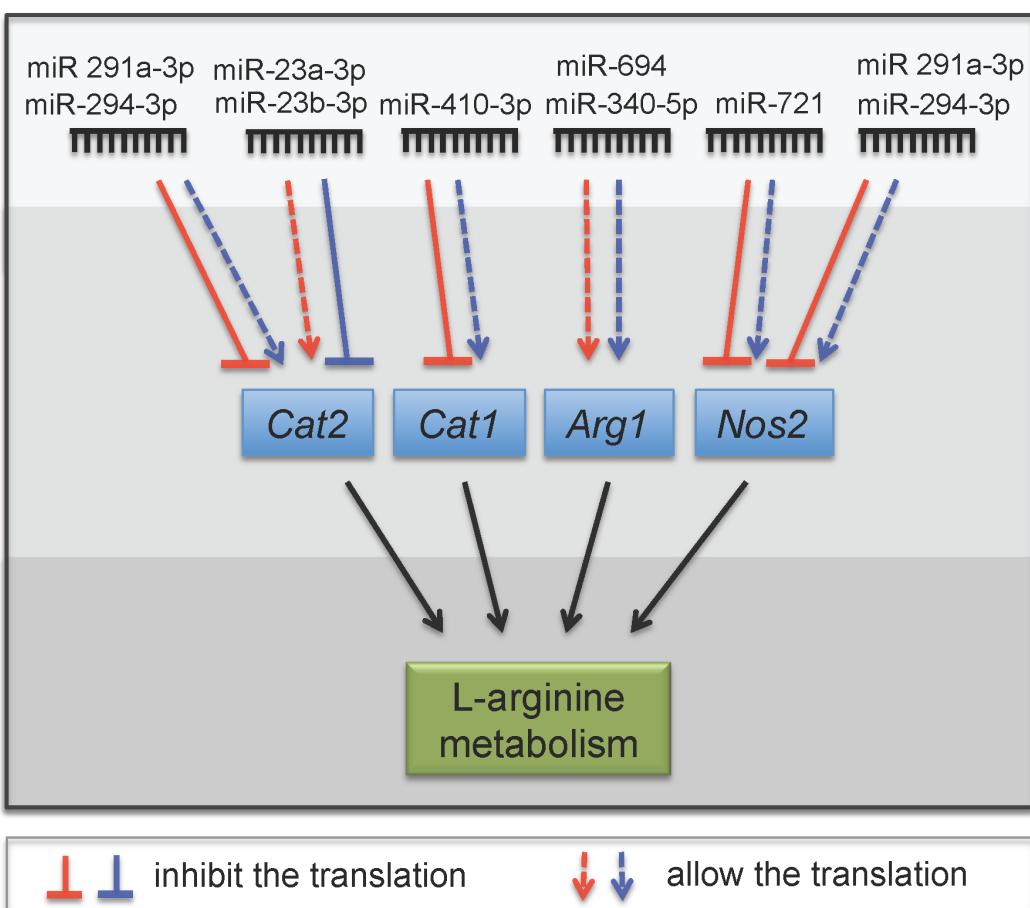

***Leishmania (Leishmania) amazonensis* induces macrophage miR-294 and miR-721 expression and modulates infection by targeting NOS2 and L-arginine metabolism**

Sandra Marcia Muxel¹, Maria Fernanda Laranjeira-Silva, Ricardo Andrade Zampieri, Lucile Maria Floeter-Winter¹.

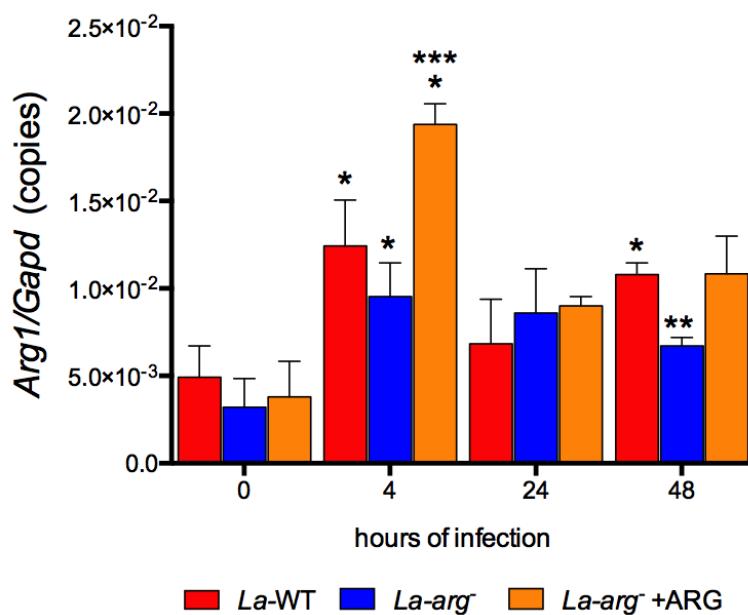

Supplementary Figure S1: Comparative analysis of BMDMs infected with *La*-WT and *La*-arg⁻ *L.* (*L.*) *amazonensis*. BMDMs (2×10^5) were plated into chamber slides overnight and infected with *La*-WT or *La*-arg⁻ *L.* (*L.*) *amazonensis* (MOI 5:1). After 4 h, the cultures were washed and maintained for 12, 24, 48 and 72 h. The plates were fixed and stained with Giemsa, and the index of infection was determined via microscopic counting of infected macrophages and amastigotes per macrophage. The data represent the mean \pm SEM of 3 independent experiments ($n = 600$ macrophages).

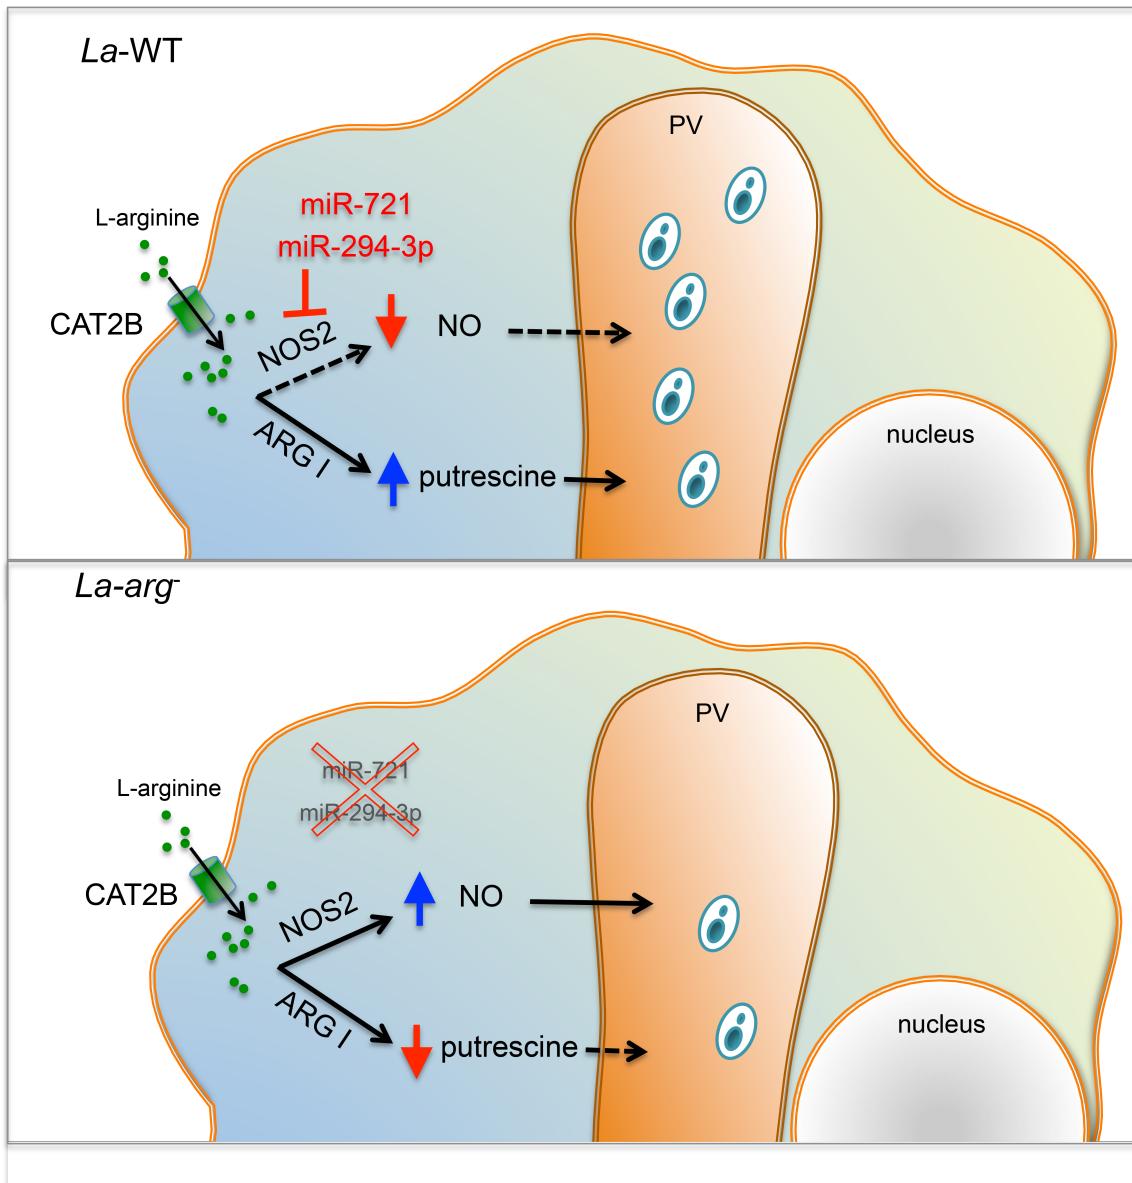

*, p<0.05, compared to 4 hours of infection. **, p<0.05, WT compared to *La*-arg⁻.

Supplementary Figure S2: Schematic representation of in silico analysis results from the search for predicted mRNA targets for the miRNAs modulated during *L. (L.) amazonensis* infection. The predicted mRNA targets for the miRNAs modulated during *La-WT* (red lines) or *La-arg⁻* (blue lines) *L. (L.) amazonensis* infection suggested the modulation of mRNAs that code for enzymes involved in arginine metabolism, such as miR-291 and miR-294, which target *Cat2b* and/or *Nos2*, miR-410, which targets *Cat1*, and miR-721, which targets *Nos2*. Predictions were made using microRNA.org, TargetScan and the miRWALK database.

Supplementary Figure S3: Arg1 mRNA in BMDMs infected by *La*-WT, *La*-*arg*⁻ and *La*-*arg*⁻+ARG *L.* (*L.*) *amazonensis*. BMDMs (1×10^6) were plated overnight and co-cultivated with *La*-WT (red) or *La*-*arg*⁻ (blue) or *La*-*arg*⁻+ARG (*L.* (*L.*) *amazonensis*) (MOI 5:1). After 4, 24 and 48 h of infection, the Arg1 mRNA from *L.* (*L.*) *amazonensis* was quantified via RT-qPCR. Each bar represents the mean \pm SEM of the values obtained in 3 independent experiments. *, p<0.05, compared to uninfected macrophages (0 hours of infection). ***, p<0.05, WT compared to *La*-*arg*⁻. **, p<0.05, *La*-*arg*⁻+ARG compared to *La*-*arg*⁻.

Supplementary Figure S4: Schematic representation of the effects of miR-294 and miR-721/Nos2 mRNA targets in the L-arginine/NO pathway during *L. (L.) amazonensis* infection. Infection of macrophages increases the activity of polyamine pathways that promote *Leishmania* survival by increasing the expression of the host L-arginine transporters CAT2B and CAT1, which increase L-arginine uptake and ARG1 activity. At the same time, the negative regulation of the NOS2- and NO-producing pathway, which was induced by the miR-294 and miR-721 expression that degraded *Nos2* mRNA, consequently inhibited NO production and parasite killing. PV: parasitophorous.

S1 Table: Macrophage miRNA regulation during WT *L. (L.) amazonensis* (*La*-WT) infection. Fold (Fold regulation) represents the fold change results at a biological magnitude. Values > 1 indicate positive regulation and values < 1 indicate negative regulation.

miRNA	<i>La</i> -WT - 4 h		<i>La</i> -WT - 12 h		<i>La</i> -WT - 24 h		<i>La</i> -WT - 48 h

Comprehensive view of miRNA predicted targets on mRNA 3' UTR region produced by miRWalk and other program

Note : The below table displays all putative targets produced by both miRWalk and other programs i.e. contains all the putative targets of other programs (3rd party algorithms).

MicroRNA	Gene	miRanda	miRDB	miRWalk	RNA2D	Targetscan	SUM
mmu-miR-294	Nos2	1	0	1	0	1	3

S4 Table: In silico analysis of predicted miR-721 mRNA targets. Prediction analysis of miR-721 binding sequences in the 3' UTR of mRNA targets using the miRWalk software.

Comprehensive view of miRNA predicted targets on mRNA 3' UTR region produced by miRWALK and other programs
Note : The below table displays all putative targets produced by both miRWALK and other programs i.e. contains all the putative targets of other programs (3rd party algorithms).

MicroRNA	Gene	miRanda	miRDB	miRWALK	RNA22	Targetscan	SUM
mmu-miR-721	Nos2	1	0	0	0	1	2
