

c-Myc is regulated by HIF-2 α in chronic hypoxia and influences sensitivity to 5-FU in colon cancer

Supplementary Materials

Supplementary Figure S1: Knockdown of c-Myc impairs chemosensitivity to 5-FU in colon cancer cells. (A) The expression of c-Myc was measured by Western blotting after transfection with a c-Myc targeted siRNA in HCT116 and SW480 cells. (B) Relative cell viabilities were assessed by MTS after transfection of negative control siRNA or c-Myc targeted siRNA in HCT116 and SW480 cells. Asterisks indicate statistical significance.
