

ING4 suppresses tumor angiogenesis and functions as a prognostic marker in human colorectal cancer

Supplementary Materials

Supplementary Figure S1: The real time PCR confirmed that ING4 had no effect of Sp1 mRNA expression in p53^{+/+}HCT116 cells.

Supplementary Figure S2: Representative images of ING4 immunohistochemical staining in human CRC tissues. Note: original magnification, $\times 400$.

Supplementary Figure S3: ROC is obtained to determine the optimal cutoff value of ING4 expression. ROC obtains the area under the curves (AUCs) at different cutoff values of ING4 IRS for 1, 3 and 5 years of overall survival time
