

## Twist1 promotes radioresistance in nasopharyngeal carcinoma

### SUPPLEMENTARY FIGURE

**Supplementary Figure S1: Twist1 induces EMT-like phenotype in NPC cells.** **A.** The IB analysis of WCLs derived from CNE2 and CNE2-R cells specific for Twist1, E-cadherin, N-cadherin, Vimentin. **B.** The IB analysis of WCLs derived from CNE2 and CNE2-T cells. **C.** The IB analysis of WCLs derived from CNE2 cells transfected with Sh-Twist1 lentivirus. **D.** The IB analysis of WCLs derived from CNE2 control and CNE2 Sh-Twist1 cells. **E.** The representative images of transwell assay in different cell lines. Photos were taken under 200X magnification. **F.** The representative morphologic images of different cell lines. Photos were taken under 200X magnification.
