

Additional file 4. Serum transaminase levels in different strains of mice. Serum AST levels in sera of non-treated, pyrazole- (100 mg/kg body weight/day x 3 days, i.p.) and phenobarbital- (80 mg/kg body weight/day x 3 days, i.p.) treated Balb, CBA, B6, B10, D1, D2, F1 and SW mice. Levels (IU/L) are expressed as ratio of induced to average constitutive levels (100%). *: levels are different from those of vehicle controls of the same strain ($P < 0.05$, Kruskal Wallis test followed by Mann-Whitney U test).
