

Andrographolide impedes cancer stemness and enhances radio-sensitivity in oral carcinomas via miR-218 activation

Supplementary Materials

Supplementary Figure S1: miR-218 suppresses self-renewal and invasion abilities pLV-miR-218- and pLV-miR-Scr.-transfected OCSC cells were analyzed for secondary spheres-forming (A) and invasion (B) abilities. * $p < 0.05$ vs. Control.
