

Peroxiredoxin 2 is associated with colorectal cancer progression and poor survival of patients

Supplementary Materials

Supplementary Table 1: The original data of this study. See Supplementary_Table_1

Supplementary Table 2: Distribution of continuous variables of the study cohort

Variable	Median	Mean \pm SEM	Range	Percentile	
				25th	75th
Age (years)	64.0	63.0 \pm 0.7	35–89	55.0	70.3
Tumor size (cm)	5.7	6.1 \pm 0.2	1.5–14.6	4.4	7.2
Serum CEA level (ng/mL)	12.0	13.5 \pm 0.7	0.8–55.2	6.7	16.8
DFS(months)	55.0	44.9 \pm 1.2	2–60	29	60
DSS(months)	60.0	48.1 \pm 1.1	2–60	35	60

Abbreviations: CEA, carcinoembryonic antigen; DFS, disease-free survival; DSS, disease-specific survival; SEM, standard error of mean.
