

1 **S2 Table. Results of repeated-measures MANOVA on the effects of predators and clothianidin concentration on periphyton,**
 2 **phytoplankton, and zooplankton on the two sample dates.** Bold P-values are significant at $P < 0.05$.

		Multivariate test			Univariate tests (<i>P</i> values)		
		df	F	P	Periphyton	Phytoplankton	Zooplankton
Within subjects	Time	3,27	10.5	<0.001	<0.001	<0.001	0.218
	Time*Predator	3,27	1.3	0.300	0.490	0.424	0.169
	Time*Clothianidin	6,54	1.5	0.195	0.980	0.036	0.249
	Time* Predator*Clothianidin	6,54	3.3	0.007	0.063	<0.001	0.867
Between subjects	Predator	3,27	2.4	0.093	0.143	0.016	0.954
	Clothianidin	6,54	3.6	0.004	0.990	<0.001	0.922
	Predator*Clothianidin	6,54	3.3	0.008	0.181	0.002	0.497
