

1 **Table S3. Results of repeated-measures MANOVA on the effects of predators and clothianidin concentration on temperature,**
 2 **conductivity, and pH on the two sample dates. Bold P-values are significant at $P < 0.05$.**

		Multivariate test ¹			Univariate tests (<i>P</i> values)		
		df	F	P	Temperature	Conductivity	pH
Within subjects	Time	3,27	753.5	<0.001	<0.001	0.013	<0.001
	Time*Predator	3,27	1.7	0.184	0.036	0.540	0.591
	Time*Clothianidin	6,54	6.6	<0.001	0.194	0.151	<0.001
	Time* Predator*Clothianidin	6,54	1.6	0.166	0.288	0.841	0.042
Between subjects	Predator	3,27	5.6	0.004	0.846	0.672	0.001
	Clothianidin	6,54	1.3	0.295	0.123	0.460	0.108
	Predator*Clothianidin	6,54	2.5	0.033	0.640	0.038	0.005
