

1 **S4 Table. The results of analyses on the survival and biomass of all predator species**
 2 **combined and each individual species when exposed to different levels of clothianidin. P-**
 3 **values are listed with associated Chi-squared-statistics; bold P-values are significant at P <0.05.**

Source	d.f	Mortality		Mass	
		Chi-squared	P	Chi-squared	P
Total	2	7.85	0.020	10.72	0.005
<i>Anax</i>	2	9.77	0.008	5.73	0.057
<i>Orconectes</i>	2	30.62	<0.001	6.94	0.030
<i>Belostoma</i>	2	13.99	<0.001	7.6	0.022
<i>Notonectid</i>	2	9.62	0.009	5.63	0.060
