

Supplementary Figure 1

A

NLS: Nuclear Localization Signal
 PGK: Phosphoglycerate kinase gene promoter
 pA: Polyadenylation signal
 FRT: Flp Recombinase Target Sequence
 Flpe: Enhanced Flp Recombinase

B

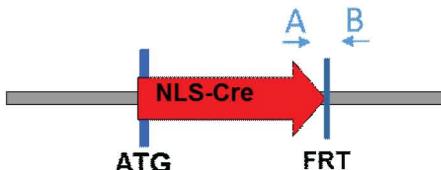

Lyz2-Cre allele genotyping

Detection of *Lyz2-Cre* knock-in allele:

Sense primer (A): Cre-F3 TTGTCATGAAC TATATCCGTAACCTGGA

Antisense primer (B): Lyz2-3R CGGCCAGGCTGACTCCATAGTA

PCR products: WT = N/A; Cre knock-in allele = 285 bp

Supplementary Figure 1. Production of BALB/cJ *Lyz2-Cre* knock-in mice. (A) Schematic representation of gene targeting method used in the production of the *Lyz2-Cre* knock-in mice. (B) The locations and sequences of the PCR primers used to confirm the gene targeting and sizes of the expected PCR products are shown.
