

Table S3. Table of compliance between groups defined by GBTM according to the exclusion or not of patients with less than four available biological measurements

	From the sample of patients with at least four available values			
	"Rapid PTH drop" group	"Gradual PTH decrease" group	"Slow PTH decrease with high phosphate" group	"Uncontrolled SHPT" group
From the entire sample				
"Rapid PTH drop" group	31	0	0	0
"Gradual PTH decrease" group	1	89	0	0
"Slow PTH decrease with high phosphate" group	0	0	99	0
"Uncontrolled SHPT" group	0	0	0	31

Abbreviations: GBTM=group-based trajectory modeling; PTH=parathyroid hormone; SHPT=secondary hyperparathyroidism
