

Supplementary Data

SUPPLEMENTARY FIG. S1. TBX18 and WT1 are coexpressed in the epicardium of the embryonic heart. The majority of epicardial cells (E10.5–E14.5) immunostained as double positive for TBX18 and WT1. *Yellow in the inset panels* shows TBX18 and WT1 coexpression. Note the TBX18-nonspecific background staining of the myocardium. *Arrows*, epicardium; *arrowheads*, pericardium; scale bars, 100 μm .
